

DAILY WORK REPORT

Intern Name: Subrahmanya K R

Department: AI & DS

Internship Domain: AI & DS

Date: 11-04-2026

Team Number: 2

Project Title: Smart Cardiology Document Processing & Decision Support. Modules: 7) Analytics Dashboard 6) Critical Alert System (partial)

1. Work Summary

Built the main PyQt dashboard window and set up layout containers for each key section. From there, developed the KPI card components and refined their formatting adjusting spacing and typography to improve overall readability and visual presentation.

2. Task Breakdown

Sl.No.	Task /Work Description	Start Time	End Time	Status (Completed/In Progress/Pending)
1.	Set up the PyQt dashboard layout and created containers for each section, establishing a clear structure for the interface.	10:30AM	1:00PM	Completed
2.	Built the KPI card components and applied initial styling and formatting to give them a clean, consistent look.	6:30PM	8:00PM	Completed

3. Challenges & Issues Faced

Had some alignment issues while working with nested layouts, so I adjusted the spacing and stretch factors to get everything aligned properly. Getting all the KPI cards to the same size and keeping the spacing consistent also took a few rounds of fine-tuning before it looked right.

4. Pending Tasks if any for Current Day & Action Plan for Next Day

Need to integrate an Excel-based demo dataset and linked the KPI cards to dynamically calculated values, so the dashboard updates automatically based on the data.
