

DAILY WORK REPORT

Intern Name: Subrahmanya K R

Department: AI & DS

Internship Domain: AI & DS

Date: 13-04-2026

Team Number: 2

Project Title: Smart Cardiology Document Processing & Decision Support. Modules: 7) Analytics Dashboard 6) Critical Alert System (partial)

1. Work Summary

Integrated the Excel-based demo dataset into the dashboard, pulling in data from multiple sheets to keep everything well-structured. Alongside that, developed an ECG trend line chart using Matplotlib and incorporated it into the dashboard, making sure the styling and formatting aligned smoothly with the overall design.

2. Task Breakdown

Sl.No.	Task /Work Description	Start Time	End Time	Status (Completed/In Progress/Pending)
1.	Integrated the Excel-based demo dataset into the dashboard and linked it to the KPI metrics, allowing the values to update dynamically based on the data.	9:30AM	11:00AM	Completed
2.	Developed an ECG trend line chart using Matplotlib and integrated it into the dashboard, ensuring it fits smoothly with the overall layout and design.	2:30PM	4:00PM	Completed

3. Challenges & Issues Faced

Handling data extraction across multiple Excel sheets required careful validation to make sure everything was mapped correctly. In addition, the date labels on the chart’s X-axis weren’t very readable at first, so they needed some adjustments to improve clarity.

4. Pending Tasks if any for Current Day & Action Plan for Next Day

Will implement a risk distribution pie chart using AI prediction data, ensuring it clearly represents the proportion of different risk categories.
