

DAILY WORK REPORT

Intern Name: Subrahmanya K R

Department: AI & DS

Internship Domain: AI & DS

Date: 14-04-2026

Team Number: 2

Project Title: Smart Cardiology Document Processing & Decision Support. Modules: 7) Analytics Dashboard 6) Critical Alert System (partial)

1. Work Summary

I built a risk distribution pie chart to clearly represent the different AI prediction categories and integrated it seamlessly into the dashboard. Alongside that, I created a district-wise center distribution bar chart to provide a more detailed regional view. Both charts were carefully styled to align with the overall dashboard design, ensuring a consistent and visually cohesive user experience.

2. Task Breakdown

Sl.No.	Task /Work Description	Start Time	End Time	Status (Completed/In Progress/Pending)
1.	I developed a risk distribution pie chart using AI prediction data and seamlessly integrated it into the dashboard.	10:30AM	1:00PM	Completed
2.	I implemented a district-wise center distribution bar chart and refined its styling to improve clarity and overall visual appeal.	2:30PM	3:00PM	Completed

3. Challenges & Issues Faced

When multiple categories were displayed, the pie chart labels started to overlap, which made the visualization harder to read. To fix this, I adjusted the formatting to improve clarity and ensure each segment was properly labeled.

In the bar chart, the district names along the axis were affecting readability, especially when they were longer. I resolved this by rotating the axis labels and fine-tuning the spacing, making the chart much easier to interpret at a glance.

4. Pending Tasks if any for Current Day & Action Plan for Next Day

I will develop a doctor performance analytics table and integrate it into the dashboard.
