

DAILY WORK REPORT

Intern Name: Subrahmanya K R

Department: AI & DS

Internship Domain: AI & DS

Date: 15-04-2026

Team Number: 2

Project Title: Smart Cardiology Document Processing & Decision Support. Modules: 7) Analytics Dashboard 6) Critical Alert System (partial)

1. Work Summary

I developed a doctor performance analytics table and set it up to dynamically reflect doctor activity data. To enhance usability and maintain a consistent look, I applied advanced styling introducing modern headers, clean row formatting, and aligning the overall design with the dashboard’s visual theme.

2. Task Breakdown

Sl.No.	Task /Work Description	Start Time	End Time	Status (Completed/In Progress/Pending)
1.	I developed a doctor performance analytics table and populated it with dynamic data, ensuring it updates seamlessly as new information becomes available.	10:30AM	1:00PM	Completed
2.	I applied advanced styling to the table, refining the headers, row colors, and overall formatting to enhance clarity and create a more polished look.	2:30PM	4:00PM	Completed

3. Challenges & Issues Faced

Getting the column alignment and header spacing right took a few iterations to achieve a clean, well-balanced layout. At the same time, ensuring consistent styling across all table elements meant refining the stylesheet multiple times until everything felt cohesive and visually aligned with the rest of the dashboard.

4. Pending Tasks if any for Current Day & Action Plan for Next Day

I will begin enhancing the overall dashboard theme and improving the UI design to create a more polished and user-friendly experience.
