

DAILY WORK REPORT

Intern Name: Subrahmanya K R

Department: AI & DS

Internship Domain: AI & DS

Date: 17-04-2026

Team Number: 2

Project Title: Smart Cardiology Document Processing & Decision Support. Modules: 7) Analytics Dashboard 6) Critical Alert System (partial)

1. Work Summary

I added a clean, well-structured header with a title, subtitle, and a few key action buttons to make the dashboard easier to navigate. I also brought in a sidebar navigation panel and adjusted the layout to respond better across different screen sizes, giving the whole interface a more polished, software like feel.

2. Task Breakdown

Sl.No.	Task /Work Description	Start Time	End Time	Status (Completed/In Progress/Pending)
1.	I implemented a header and navigation bar with a clear title, subtitle, and action buttons to improve structure and usability.	11:30AM	1:00PM	Completed
2.	I integrated a sidebar navigation panel and fine-tuned the layout to improve responsiveness across different screen sizes.	3:30PM	5:00PM	Completed

3. Challenges & Issues Faced

Getting the header elements to line up properly took a few layout tweaks to sort out spacing and alignment. Bringing in the sidebar also impacted the overall responsiveness, so I had to rebalance the layout proportions to keep everything looking stable and well-structured across different screen sizes.

4. Pending Tasks if any for Current Day & Action Plan for Next Day

I will enhance the KPI cards with more advanced design elements and refine how the metrics are presented to make them clearer and more visually impactful.
